It's a bright and sunny day, but the streets are empty and silence looms all around.

The school gates are locked and there is not a single person on the streets.

Amina, Oliver, Tara and Akachi are all stuck inside their houses. They are bored as they are not allowed to step out of the house.

Frustrated, Akachi decides to find an answer. He calls up his uncle who is a very well-known doctor and works in the city.

Uncle are we all  
going to die?  
what? People are  
suffering from  
Corona.

Akachi relax!  
Corona is a virus  
like a lot of other  
resperatory viruses  
that already exist  
and spread through  
human droplets.

So,  
can I go out and  
play with my  
friends?

No,  
I'll text you all  
the details  
about what  
Corona is.

Oh no!

Corona!

Haha,  
this is not Corona.  
you cannot see it  
with bare eyes. but  
it is dangerous and  
can make people  
ill.

The disease is called COVID-19.

COVID-19

I knew this  
already.

You look sad,  
what  
happened?

It's my little sister's  
birthday tomorrow.  
Our parents have  
cancelled the party!

It's not fair,  
no one around us has  
COVID-19.  
So aren't we safe?

Guys! Corona  
doesn't respect  
borders.

Africa, Asia, America, Europe, big cities, small cities, villages,  
anywhere!

Cities are more affected because they are crowded. Precaution is the key!

Corona enters the body through mouth, eyes or nose.

So if an infected person sneezes, coughs or shakes hands, it spreads to others.

My mother  
sneezed this  
morning. Is she  
going to die?

One sneeze  
doesn't mean  
anything.

But a person  
can have  
COVID-19  
without  
showing any  
symptoms.

This is why  
Corona spreads  
easier than the  
flu.

When corona enters your body it multiplies, and can cause high temperture and cough.

Older people and those with existing health conditions can get seriously ill. Sometimes they need to be hospitalised.

But I still feel bad  
for Amina's sister!

Amina's parents are  
doing the right  
things! It's called  
social distancing.

Ok,  
Cheer up  
Amina!

A cartoon illustration of a woman with dark hair in a braid, wearing glasses and a white top. She is pointing her right index finger upwards. A speech bubble originates from her hand, containing text. The background is a simple light gray with some faint lines suggesting a wall or window.

We must all  
practise social  
distancing.  
It is a very  
effective way to  
avoid spreading  
the virus.

My parent said  
social distancing  
means staying  
home and avoiding  
groups of people.

No team sports.  
No movies.  
No eating at a restaurant....

and no birthday parties!

But what if we need to buy food or see a doctor?

There are simple things we can do to minimise the risks. Do not kiss, hug or shake hands.

Just smile or  
say hi.

Keep a distance of  
1.5 meters to  
other people.

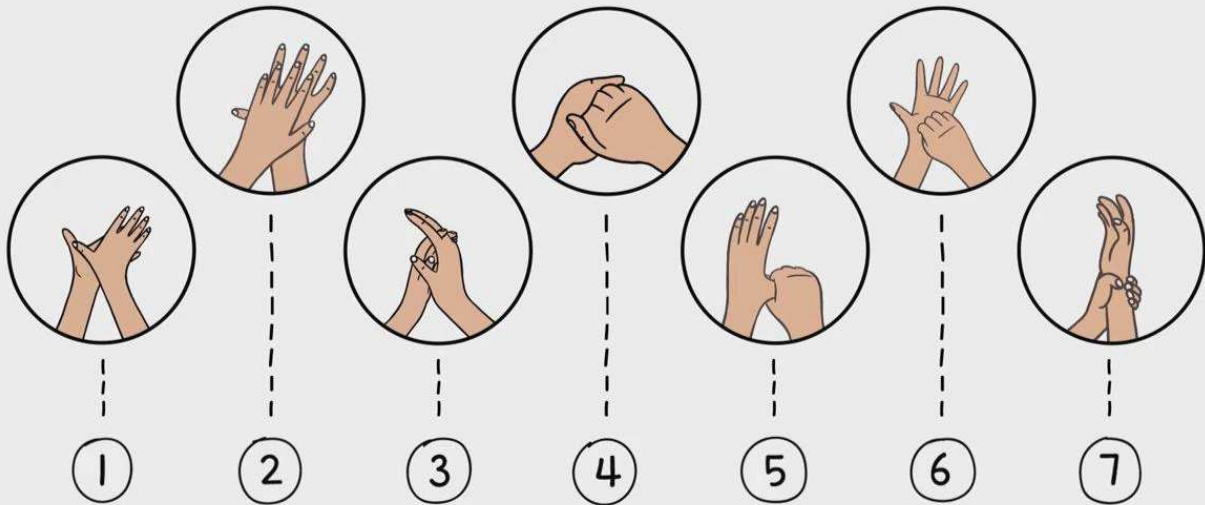

Sneeze and cough on  
your elbow.

Wash your hands with soap  
when you come back home  
from outside.

## Steps

and wash your hands if you come in contact with other people.

Alternatively,  
you can clean  
your hands with  
an  
alcohol-based  
handrub.

Guys, together  
we can slow  
down the  
spread of the  
virus!

Till then we can  
play indoor  
games, read  
books and get  
our homework  
done!

An illustration of a city scene with several balconies. In the top left, a woman in a pink hijab and a young girl in a yellow dress are on a balcony with laundry. In the top right, a woman in a white t-shirt and blue pants stands on a balcony with a small plant. In the bottom left, a boy in a grey shirt and blue pants stands on a balcony with a potted plant. In the bottom right, a boy in a green shirt and blue pants with a red cape stands on a balcony, holding a book and waving. A large speech bubble is in the center, containing the text "Let's share everythings we know, with everyone we know." The background shows grey buildings and windows.

Let's share  
everythings we  
know, with  
everyone we  
know.

Happy birthday!!!

REMEMBER!

## Remember:

- Stay at home!
- Only physically interact with your closest family members.
- Don't leave the house unless it's absolutely unavoidable.

## If you have to leave the house:

- Keep 1.5 meters distance from other people.
- Wash your hands with soap after you get back home.
- It doesn't matter if you live in a city or village.
- Protect yourself, your family and everyone around you!
